

# MONROE COUNTY WATER AUTHORITY

## Project Information Bulletin

# Baker Hill Tank Rehabilitation

## Town of Victor

*Eng. No. 19-008*

*October 2019*

---

As part of Monroe County Water Authority's tank maintenance program, tanks are repainted approximately every 20 years. The Baker Hill Tank will be repainted this year with site work starting in October. A map showing the location of the Tank is provided on the back of this bulletin.

This bulletin explains the upcoming work, as well as whom to contact if you have any questions while the work is being done.

### **Why does MCWA paint water storage tanks?**

Steel water tanks are painted to prevent corrosion of the base metal. The paint on a water tank can be compared to the paint on a house. Both protect the base material, both require periodic maintenance and both require removal of loose paint and repair of damaged material prior to applying new paint.

### **How long will the new paint last?**

The new paint systems chosen for the interior and exterior are expected to last about 20 years with proper maintenance.

### **How will this affect my water supply?**

Typically this work is accomplished in the spring or fall when the water demands are lower. You should not see any significant changes in water pressure or flow during this work.

### **How is the tank repainted?**

All existing exterior and interior paint will be removed. The exterior may be surrounded by hanging tarps to capture blast material, then three coats of new paint will be applied. Two coats of new paint will be applied to the interior.

### **What color will the Tank be?**

The new exterior paint will be a light or sky blue.

### **How long will the work take?**

Paint removal work will begin as early as the first week in October. The project should be complete in December.

### **Whom should I contact if I have questions?**

A Water Authority inspector will be on-site throughout the project. All of our inspectors carry a photo ID card, wear Water Authority uniforms, and drive a vehicle with a Water Authority logo on it. You can also contact our Customer Service representatives at 442-7200 weekdays from 8:30 a.m. to 4:30 p.m., or our Dispatcher at 442-2009 weekdays before 8:30 a.m., after 4:30 p.m., and on weekends and holidays.
