

## MONROE COUNTY WATER AUTHORITY

### Project Information Bulletin

# Brockport WTP West Side Demolition Phase III

## Town of Hamlin

*Eng. No. 19-020*

*September 2020*

---

As part of Monroe County Water Authority's maintenance program, the western portion of the building and elevated steel water storage tank at 8100 Newco Drive will be removed this year with work starting late-September. A project map showing the location of the facility is provided on the back of this bulletin.

This bulletin is designed to explain the upcoming work, as well as whom to contact if you have any questions while the work is being completed.

### **Why does MCWA remove facilities like this?**

Buildings and water tanks become obsolete when they reach their end of service life or when the population they serve has out grown their available supply. In this case both of the criteria for removal of the tank have been met.

### **How will this facility be "demolished" safely?**

The building will be taken down with heavy equipment and loaded into roll-off type containers. The tank will be taken down piece by piece. Starting from the top, pieces will be cut and dropped safely into the belly of the tank and or lowered down to the ground by a large crane.

### **How will this affect my water supply?**

This facility has not been in service for many years. You will not see any changes in water pressure or flow due to this work.

### **How long will the work take?**

The project will take about 4 weeks in total.

The building and tank removal will happen in the first 2 weeks of the project.

Restoration will include the removal of concrete foundations and restoration of the work area. This phase and the project will be complete by the end of October. Lawn areas will be restored by May of 2021.

### **Whom should I contact if I have questions?**

A Water Authority inspector will be on-site throughout the project. All of our inspectors carry a photo ID card, wear Water Authority uniforms, and drive a vehicle with a Water Authority logo on it. You can also contact our Customer Service representatives at 442-7200 weekdays from 8:30 a.m. to 4:30 p.m., or our Dispatcher at 442-2009 weekdays before 8:30 a.m., after 4:30 p.m., and on weekends and holidays.
