Questions:

- Thank you for sharing the POD ID for each account. I'm assuming that is simply the account number, correct?
- Also, on the procurement form, it asks for the Contract Procurement Number. Is that File 21-S04?

Answers:

- The POD ID below is a different RG&E identification number than the account number, which was provided in the RFP. The POD ID can be helpful because it's the one more commonly used internally at RG&E rather than the account number, especially for load shedding or other usage/service activities.
- For this project, the "Contract Procurement Number" asked for on the RFP form is 210909-02.
